

PRODUCT CATALOGUE MAGICRETE S.R.O.

Cultured stone molds • Paver tile molds • Fencing molds

MAGICRETE® s.r.o. is a leading manufacturer of polyurethane molds for a wide variety of applications – cultured stone, double and single sided fencing systems and paver tiles. Superior quality and extreme durability are the main characteristics of MAGICRETE® products. More than 20 years of expertise and strict quality control during all phases of production guarantee absolute product quality.

Professional dedication and implementation of latest technological advancements enable us to produce high quality molds, which are used by professionals worldwide. All products are manufactured from high-grade polyurethane and have aservice life of up to 3000 production cycles. With our products you will receive ultimate quality of finished products and excellent service life of molds themselves. Our main goal is to supply molds, which would enable our clients to carry out profitable business operation by manufacturing life-like imitation with utmost attention to details.

Unlike many other mold producers, MAGICRETE® has a full-scale manufacturing of finished products using the same molds we offer for sale. All the models found in our product range have been carefully crafted from a natural material such as stone, wood or hand-made brick, with all the details and texture nuances transferred to the final product. Our research and development team is constantly working on improving the already excellent properties of existing products and developing new ones.

Whether you are a self-employed entrepreneur looking for new business opportunities, or an established company in the field of construction materials seeking to expand your product range, MAGICRETE® can offer you a wide selection of products and services, which will be tailored to your needs and possibilities.

Top quality products – great competitive advantage

All finished products manufactured in MAGICRETE® molds look extremely lifelike, with detailed texture and rich, natural colours. The reason for this is fine texture of the mold, which transfers the stone surface up to the smallest detail, and application of MAGICRETE® decorative techniques with the use of special colour agents and additives. This provides a great competitive advantage and ensures profitable operation.

High grade components – solid foundation for your business

Quality molds are basis for a reliable and high-profitable production. Our moulds are manufactured from a combination of different polyurethane resins, which provide for the best results in terms of productivity and service life. All the molds are manufactured using automated casting equipment, ensuring top quality and extreme durability. Strict quality control ensures that the customer receives goods of highest quality.

Complete solution for your business

We are offering you acomplete solution – starting from molds and additives, to manufacturing equipment and individual planning of the production. Since we are amanufacturer ourselves, we will provide you with the necessary expertise in terms of organization, logistics, choice of raw materials and components, as well as proper marketing of the product. We provide training courses directly at our facility in Prague, where you will be trained to produce high-quality products. Our goal is to help you set up aprofitable business!

MAGICRETE® s.r.o.

Cultured stone, also know as artificial or veneer stone is manufactured from concrete or other mix design using flexible molds. It has a wide variety of applications, ranging from masonry and façade tiles to many types of interior decoration. MAGICRETE® offers a big selection of molds for production of cultured stone – our product range includes a variety of ledgestone designs, fieldstone imitation, brick tiles and wood imitation. By choosing MAGICRETE® products you receive top quality polyurethane molds, which would benefit your business and give you a great competitive advantage.

BENEFITS OF MAGICRETE® MOLDS

- **High quality polyurethane developed specifically for wetcast technology**Polyurethane resin which we use for production of molds is designed to withstand specific conditions of cultured stone manufacturing.
- All our products are manufactured by automated polyurethane processing machinery This guarantees high quality products and prolonged service life.
- All models are designed in-house by MAGICRETE®

All the product models have been designed using natural stone, brick and wood and carefully transferred into molds, meaning that all the texture nuances will be visible on the finished product.

• MAGICRETE® is an established cultured stone manufacturer

How many companies which are selling molds also have their own production of finished products? Very few. MAGICRETE® is a leading European manufacturer of cultured stone, fencing systems and paving tiles and we use the same molds at our production facility.

• Strict quality control

All the products are being monitored and quality controlled at different stages of production in order to ensure that you receive the top quality molds.

MOLDS FOR CULTURED STONE

RKS artificial stone mold

- Mold type:
 polyurethane with A45 Shore hardness
- Texture optics: Rock ledge
- Product format:
 550 x 120 mm / 350 x 120 mm / 200 x 120 mm
- Corner stones are made of 2 flat pieces with decorative edges (RKS6060C mold)

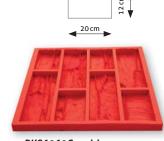

Product format

RKS6060B mold4 elements
size 550 x 120 mm = 0,264 m²

RKS6060C mold 4 elements size 350 x 120 mm = 0,168 m² 4 elements size 200 x 120 mm = 0,096 m²

Totoal product are of 1 set of molds:

0,792 square meters

These elements have decorative edges and are used for corner stones and flat tiles

Mold index	Quantity	Size of elements	Total area
RKS6060A	1	55 x 12 cm	0,264 m ²
RKS6060B	1	55 x 12 cm	0,264 m ²
RKS6060C	1	35 x 12 cm / 20 x 12 cm	0,264 m ²
1 FULL SET			0,792 m ²

TVD series (dry stack slate)

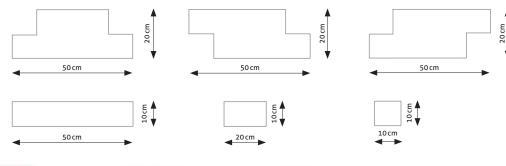

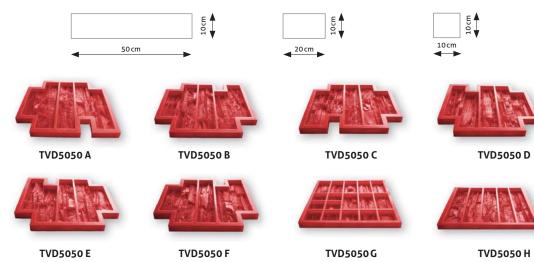

Artificial stone formats

1 set of TVD molds is comprised of 8 unique molds, which in total make up 1,76 square meters of unique stone surface.

Mold index	Product format	Product area	Finished product thickness
TVD5050 A-E	50 x 20 cm / 50 x 210 cm	0, 21 m ²	3,5 cm
TVD5050 G	20 x 210 cm / 10 x 210 cm	0, 25 m ²	3,5 cm
TVD5050 H	50 x 210 cm	0, 25 m ²	3,5 cm
TVD5050 H	50 x 210 cm	0, 25 m ²	3,5 cm
1 FULL SET	1,76 m²		

Natural stone surface

Exterior properties of veneer stone products depend on how natural the finished product looks like. All MAGICRETE® models have been created using natural stone from different regions of the country, ensuring the final product looks extremely lifelike.

Thick walls This leads to amuch more precise geometry of finished products.

Smooth inner joints Thanks to the smooth joint

anks to the smooth joint structure demolding of finished goods is done fast and easy.

High grade polyurethane

The most crucial aspect of aquality mold with long service life is the choice of proper material. Rigorous testing and extensive use of molds at our own production have proven this specific type of polyurethane to be the best choice for MAGICRETE® molds.

MACHINE PROCESSED POLYURETHANE

ALL MAGICRETE® MOLDS ARE MANUFACTURED USING AUTOMATED EQUIPMENT, WHICH GUARANTEES HIGH PRODUCT QUALITY AND LONG SERVICE LIFE.

BSL5045 A-D	0,2 m ²	43 x 11,6 cm
BSL4520 1/2	0,1 m ²	43 x 11,6 cm
BSL4520 ³ / ₄	0,1 m ²	21,5 x 11,6 cm
1 FULL SET	1 m²	

BSL series molds for production of veneer stone with crushed marble texture. Product structure is extremely detailed and refined, making it indistinguishable from the natural stone. Each piece in this collection has been carefully picked and hand-crafted into a module to create a very impressive veneer stone system. Modules have a rectangular shape with very low size tolerance (+/- 2 mm), meaning that you will never see a separate module on a finished surface, due to practically invisible joints. Installation of such tiles is very fact and cost-efficient.

Main advantages of BSL mold series:

- Texture of crushed marble is extremely detailed and life-like
- Long service life of molds thanks to use of machine mixed polyurethane
- · Molds are manufactured from high-quality polyurethane, suitable for casting both concrete and gypsum mix
- Very low size tolerance of finished products (+/- 1 mm)
- Cost of 1 m² of molds is lower due to small product thickness (up to 25 mm)
- Rectangular-shaped modules for fast and cost-efficient application

FENCING MOLDS

Fencing is a vital part of any project – starting from residential housing, to commercial and industrial fencing. MAGICRETE® is a leading manufacturer of molds for production of double and single sided fencing systems. Our product range includes several types of stone, wood and brick texture, as well as modern flat reliefs. Fencing molds are made from a combination of flexible polyurethane and rigid waterproof veneer, ensuring long service life and proper geometry of finished products.

BENEFITS OF MAGICRETE® MOLDS

- Combination of high quality polyurethane and waterproof veneer for panel molds
 We can offer a wide range of different designs and fencing systems, with main objective in mind
 high quality and extreme durability.
- All our products are manufactured by automated polyurethane processing machinery This guarantees high quality products and prolonged service life.
- Cost-effective solution

Fencing systems have been designed in order to be used effectively and generate stable profit for your business. MAGICRETE® molds do not require demanding maintenance and under proper technological conditions can be successfully used for many years.

• Same molds are used at MAGICRETE® fencing production facility

This allows us to rigorously test the molds under actual production conditions to detect any potential design and construction flaws and eliminate them.

• Strict quality control

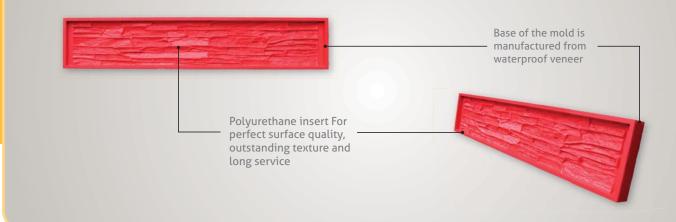

All the products are being monitored and quality controlled at different stages of production in order to ensure that you receive the top quality molds.

MAGI<u>CRETE</u>® s.r.o.

FENCING MOLDS DOUBLE SIDED FENCE SYSTEM

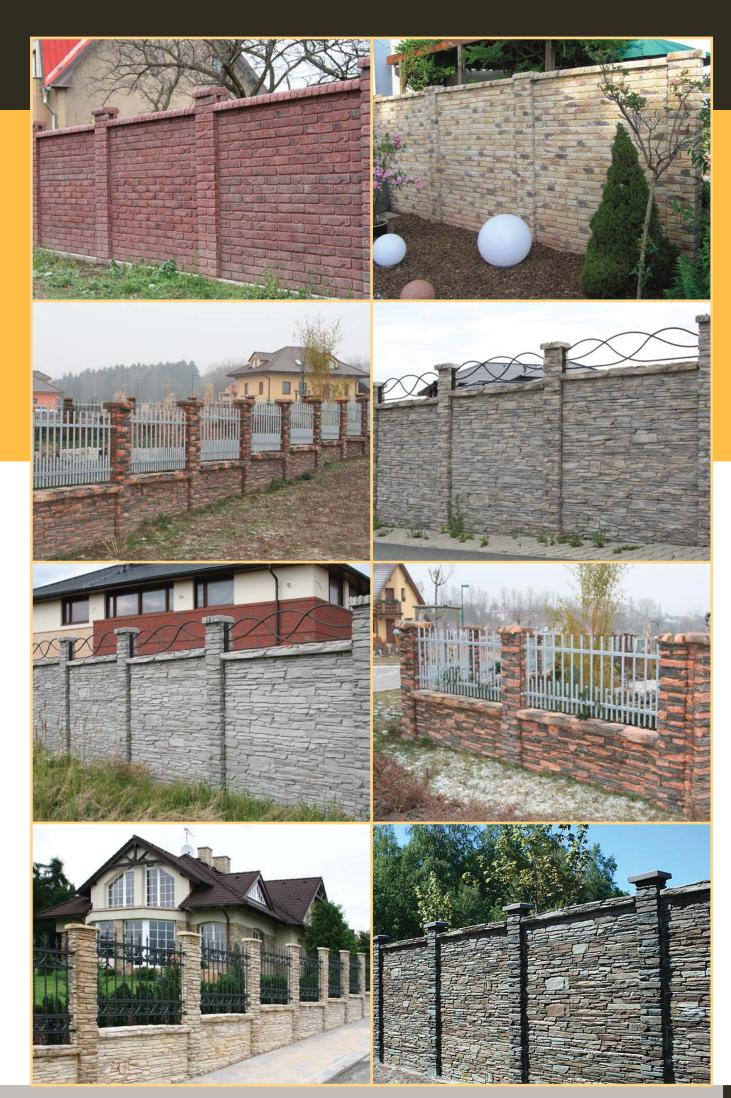

The inside layer of the mold is manufactured from high-quality polyurethane with hardness ranging from A30 to A85 Shore, depending on the form type and configuration. Outer casing of the mold is made up of water-proof construction veneer and metal casing.

Cassette mold enables the production of 2 double-sided panels in a singe cycle, which reduces the man-hours and overall costs of production.

All MAGICRETE textures are absolutely unique and manufactured by our company; therefore you will not find another mold producer with exactly the same texture.

Forms have a service life of up to 3000 production cycles and sustain superior product quality over duration of service life.

MAGICRETE® s.r.o.

PAVER MOLDS

BRW Series - wood imitation

MAGICRETE® is offering a wide range of polyurethane molds for production of wetcast pavers. The main advantage of using flexible molds is the final look of the paver – it is impossible to obtain adetailed stone or wood texture from a rigid or metal mold. By using polyurethane paver molds you will be able to offer a very competitive product at a reasonable price.

BENEFITS OF MAGICRETE® MOLDS

• Highly competitive products

By offering a finished product of outstanding look and quality you will gain a big competitive advantage.

- High quality polyurethane developed specifically for wetcast technology Polyurethane resin which we use for production of molds is designed to withstand specific conditions of cultured stone manufacturing.
- All our products are manufactured by automated polyurethane processing machinery This guarantees high quality products and prolonged service life.
- Same molds are used at MAGICRETE® production facility

This allows us to rigorously test the molds under actual production conditions to detect any potential design and construction flaws and eliminate them.

• Strict quality control

All the products are being monitored and quality controlled at different stages of production in order to ensure that you receive the top quality molds.
